EXPERIENCE
TO BE
YOUR BEST

Welcome to Mölnlycke® Talks Online

Healthcare accounts for 4.4% of total carbon emissions in the developed world. If healthcare were a country, it would be the fifth largest carbon emitter globally.

As Covid-19 has pushed healthcare systems to the limit, how can sustainability endeavours endure in the face of exceptional challenges introduced by the pandemic?

Join us for a roundtable discussion on sustainability in the OR and balancing patient and healthcare provider care with care for the environment.

The discussion will focus on:

- Balancing environmental commitments with other COVID-19 priorities
- Actions for making a sustainable difference
- Optimising patient and HCP care and safety while still caring for the environment

Meet your fellow professionals and the Mölnlycke team at our live Q&A afterwards

Prof Nicole D. Bouvy
Professor of Surgery – Innovative Surgical Techniques Maastricht University Hospital Medical Centre

Trude Ertresvåg
Director of Environmental Strategy
National Norwegian Hospital Procurement Trust

Christian Cederholm
Head of Patricia Industries, Board member of Hi3G Scandinavia, Mölnlycke Health Care and Permobil

Gary Hopkins
Moderator
